To prevent the common vitamin and mineral deficiencies normally associated with a mix feed diet, we have combined a vitamin and mineral concentrate with orange oil. This combination allows the seeds, cereals, fruit and vegetables to absorb all the vitamin and mineral concentrate. This process prevents two of the main vitamin deficiencies seen in rabbits, Vitamin A and Vitamin D. Both these vitamins are 'oil soluble', so our orange oil carrier process is perfect for maintaining appropriate levels in the food.

As with any rabbit food, it is important that fresh water and hay are always available. Hay is good source of insoluble fibre which helps maintain gut mobility.

Main ingredients include: Pellets, wheat, soybean, milo, corn, oats, extruded kibble, green split peas, flaked carrots, raisins, papaya, and orange oil
